

The Transformyx Dallas Data Center

A Tier 3 facility, with over 108,000 sq. ft. available will provide Transformyx and its reseller partners with additional Colocation, DRaaS and IaaS services. Located conveniently 15 minutes from Love Field Airport, this location is extremely convenient for customers in the Gulf South region looking for an easy to access and robust Data Center to provide Disaster Recovery and Business Continuity capabilities.

Purpose Built. People Driven.

"Transformyx established a long term growth strategy in 2010 focused on Managed and Cloud Services including Data Center Services. In 2014 we took the next step in our long term growth by focusing our energies on expanding the solutions which involve Data Center services. We look forward to continuing to partner with organizations and helping them achieve their respective goals," Claude Bethea, CEO noted.

Transformyx management anticipates that many Gulf Coast companies and organizations are seeking viable options for Data Center solutions. Transformyx also continues to partner with other technology providers through a reseller program which includes Colocation, IaaS, Hosted VoIP, Backup and DRaaS. As a competitive advantage Resellers can leverage a broad network of telecommunications providers in creating cost effective and creative custom solutions for their customers.

"The addition of a Dallas location provides our Gulf Coast Customers with an accessible and robust solution. We will build on the core of Colocation, Disaster Recovery and Business Continuity leveraging our existing High Speed Network and combining these to the Dallas location providers. With Dark Fiber Connectivity to the Infomart, we are a single hop away from over 100 providers, which provides our customers with tremendous design options as we architect solutions", stated James DuBos, Chief Technology Officer for Transformyx.

Facility Features:

- 106,866 gross sq. ft. on 8.6 acres
- Up to 60,000 sq ft of raised floor space
- 30,000 sq ft of customer/office/support space
- 10,000 sq ft Business Continuity Center for personnel
- Private turn-key PODs and powered shell space available
- All new infrastructure - No legacy end-of-life or obsolete equipment
- 36 inch raised floor
- 18 foot ceiling height clearance
- Reinforced concrete roof with FM I-90 wind uplift rated roof
- Lightning protection system
- UL certified grounding system
- Smoke detection systems in ceiling and under floor
- Double-interlock pre-action dry-pipe fire prevention system
- Covered loading dock
- Staging area and secure customer storage
- Free wireless access
- Conference rooms
- Kitchen
- 200 parking spots

Phase I Power/Cooling: (4 Phases Planned)

- Diverse path underground utility feeds
- 2 x 2500 kVA transformers at 480 volts with expansion to 10MW
- 2 MW Cummins generator backup
- 3,500 gallons of on-site fuel storage
- Four hour response time across multiple fuel providers
- 3 x 600 Liebert kVA UPS in N+1 configuration
- 12 x 125 kVA Liebert PDUs in an A/B configuration
- Transient Voltage Surge Suppression (TVSS) system
- Grounding via clean earth bonding
- 12 x 30-ton Liebert air-cooled units totaling 360 tons in N+2 configuration

Support :

- 24/7/365 facility support
- 24/7/365 on-site technical support available
- Critical building monitoring and management systems observed around the clock

Security:

- 24/7/365 secured entrance
- Physical access pre-approved via access permissions defined by the customer
- Government issued photo ID verification
- Documented ingress and egress history
- Card-key access into data center
- Locking cages / suites
- Interior and exterior video surveillance
- Custom security options available
- Perimeter fence with security gate
