Microsoft Exchange Server 2010

Increase Efficiency with Hosted Microsoft Exchange 2010

Increase your business's efficiency with Hosted Microsoft Exchange 2010 from Transformyx. Hosted Exchange 2010 includes many new features not found in previous versions of Exchange to help your employees boost their productivity by offering a consistent inbox, calendaring and contacts experience across the PC, browser and mobile phone.

OWA 2010 is now available through multiple browsers, allowing you to easily deploy a feature-rich Outlook experience in Internet Explorer 7+, Firefox 3+ and Safari 3+ browsers, and iPad O/S.

Outlook/Outlook Web App:

- **Conversation View:** Groups messages from a single conversation together which can then be managed, moved and deleted.
- **Single Page of Messages:** All messages are displayed on one page regardless of the size of the folder.
- **Nickname Cache:** Helps users address email more quickly by providing a suggested name list as a new address is typed.
- **Filters:** Now easier to apply from a convenient dropdown menu with common options.
- **Search:** More powerful with advanced queries.
- **View Shared Calendar and Contacts:** Providing the ability to check schedules and availability of users.
- **Presence:** Colorful indicators to let the user know if their contact is available to chat.
- **Instant Messaging (IM):** Contains OCS instant messaging functionality within the client.
- **SMS Sync:** Exchange ActiveSync® now provides the ability to send and receive SMS text messages from OWA on devices with Windows 6.1 or later.

Premium Infrastructure for reliability	Transformyx	Other Providers
99.999% uptime SLA	✓	99.9% (some offer an unsupportable 100% uptime "marketing" SLA)

Managed Exchange 2010 from Transformyx:

The benefit to this is there is no need to purchase hardware or software for setting up Microsoft Exchange. This service would be hosted by an Exchange provider and is charged monthly. The monthly charge is between \$10 – \$25 per month for each e-mail account (depending on add-on services requested). All the collaborative features through Exchange are provided as well as anti-virus and anti-spam software. This is a good solution for companies on restricted budgets, companies with no in-house IT staff, companies who are located in geographically unsuitable areas, companies needing regulatory compliance for their email communications, etc. In truth, companies can be more productive and always operate more cost effectively by utilizing Managed Exchange services, where they can realize, like Managed IT services, predictable, fixed-fee costs for their infrastructure. Users have the freedom and flexibility to access email from any internet connected PC, laptop or mobile device, and Managed Exchange offers synchronization to all mobile O/S handsets on the market today. That means companies can also eliminate third-party paid services like Blackberry Enterprise server, GoodLink and others. The chart below illustrates the minimum advantages to Managed Exchange vs. In-House and POP3. Please contact us today for a free demonstration and assessment!

Feature Set	Exchange 2010	POP 3/IMAP4
Group scheduling	✓	✗
Send out meeting requests, then track and update them	✓	✗
Shared calendars and side-by-side calendar views	✓	✗
Access to personal and shared address books from remote locations	✓	✗
Outlook single sign-on for email and network access	✓	✗
Outlook connections over the Internet are secure	✓	Some solutions
Server-side spam filtering	✓	Some solutions
Put multi-color flags next to emails as a reminder to follow up	✓	Partial
Ability to add voting buttons to a messages	✓	✗
Automatic out-of-office reply	✓	✗
Ability to recall sent messages	✓	✗
