

TRANSFORMYX DATA CENTERS:

A trusted place to safeguard your critical data.

//

We've invested millions of dollars into two best-in-class data centers. Along with powering our cloud services, they enable us to provide a trusted place for our customers to safeguard their critical data and IT systems.

WHY DO OUR DATA CENTERS STAND AMONG THE BEST?

Our data centers were designed by our own engineers on a validated architecture. Unlike other providers, we never have to outsource your data to third party facilities managed by people you will never know, let alone speak to.

Transformyx built and operated

Our engineers operate, monitor, protect, build out, and support the entire infrastructure

Powered by Cisco and NetApp

Our data centers are of the few Cisco Cloud Powered data centers in the Gulf South, a certification that required a number of extensive third party audits

Industrial-grade

Our data centers are built to the same specs as military, financial, and other critical services facilities

TECHNICAL SPECIFICATIONS INCLUDE:

- Tier III data center architecture
- Carrier neutral connectivity
- Support for VMs up to 64 vCPU/1TB RAM
- Validated Cisco/NetApp FlexPod architecture
- Connectivity partners include Level 3, Cox, CenturyTel, AT&T, and Carrier (Dallas)
- Fully redundant power
- State-of-the-art security
- VMware hypervisor and management stack
- 24x7x365 monitoring by a fully-staffed NOC
- Network backbone with terabit performance and 99.999% uptime

USE OUR DATA CENTERS INSTEAD OF BUILDING YOUR OWN

By using our data centers, you can build a private cloud, safeguard critical data, or improve your overall availability without making the huge investment on your own.

Colocation

Take advantage of the investment we already made and move your IT systems to our reliable, industrial grade facilities

Infrastructure as-a-Service

Add compute and storage capacity through IaaS that offers guaranteed resources, easy pricing models, and 24/7 support

Disaster Recovery

Upgrade from simple backup and protect your organization with full failover capabilities through our Disaster Recovery as-a-Service

Cloud storage

Choose from 4 service levels to meet any of your storage needs – from high performance to cold storage for archiving

You can also combine our Colocation and Infrastructure as-a-Service to create a powerful **hybrid cloud architecture** for your organization.

CREATE BETTER OUTCOMES

Because we own our data centers, we can customize solutions to help you create better business and IT outcomes.

Ditch management and real estate headaches that come with operating your own facility

Alleviate the financial and operational burdens of maintaining IT systems on-premise

Move to an OpEx IT model and invest more into revenue-producing projects

THE TRANSFORMYX DIFFERENCE

Over the past 30 years, we've evolved into a technology provider that's built to provide large organizations with the IT solutions and support they need to thrive.

In addition to **data center services**, we also offer **voice**, **IT security**, and **managed services** solutions

Large enterprise experience including **education**, **government**, **healthcare**, and **legal** organizations

Tens of thousands of clients across the US ranging from **Mid-market** to **Fortune 500** organizations
